• Next.js	• MERN Stack
• Redux	• React.js

For the last 6 months I have been doing freelance projects. Below are the links to these projects along with how I contributed to them:

- Wine-N-Dine – Implemented fetch requests to pull recipes from a Web API, built HTML pages for saved recipe routes. The project was built using Javascript, HTML, and CSS.
- Code Prep – Built back end table structures, implemented concise user friendly styling for an online interview success resource. The project was built using Javascript, Node.js, Sequelize, MySQL, and CSS.
- Birdor – Social Media website for Bird Watchers. The project was built using MERN stack technologies, GraphQL,
